[150] Hallucinogen

Song Description			
Song 1	Kors K - Programmed Sun		
Song 2	1200 Micrograms - Mescaline		
Song 3	Exaile - Let Loose		
<p>The slowest song out there. It is a mix of Psytrance at 150BPM, I like it a lot because psytrance is somehow suitable for streaming for long periods. 1200 micrograms are pretty well known, as Exaile is, but these two songs are surprisingly ITG exclusives. Programmed Sun was sped up to 150, and sounds quite good at this speed !! also found this mix enjoyable in other contexts than ITG.</p>

Difference between this and the easy chart is minimal, beginning of song 2 has now triplets all the way through. Easiest chart of the pack, may be a 12 but it is 10 min so idk.

The hardest "stamina" song without 24ths at this speed. It never really stops before the 6 minute mark, making the first run one of the longest at 150 ever written. All streams are broken but breaks are minimal.

[160] Despair

Song Description			
Song 1	Antagon - Nocturnal Nectar		
Song 2	Frixion Fanatic - The Abyss		
Song 3	The Outside Agency - Waiting Till Dark		
One of the deepest files. I love Nocturnal Nectar, but I found it a bit long past the 5 minute mark, so I mixed it with a classic cut on Obs. Cur from Frixion Fanatic, which is one of the first acidcore songs stepped for stamina. To finish the mix, the first ITG appearance of The Outside Agency despite their incredible popularity in Industrial hardcore with one of their deepest tracks. Song is really easy to zone out on which is the point of 160.

[170] Darkness

Song Description			
Song 1	LV.4 - 273.15		
Song 2	Shouton - Alien Interview		
Song 3	Xavi BCN - Paranoid		
Three classics of Stamina 170BPM, provided by stepping god @@ and Fraxtil, who definitely deserve more attention. The three genres blend nicely into each other, while staying really dark. I made several cuts in the middle to keep the file around 10' while keeping the hype parts. It has grown on me a lot since I created it, but it is a shame Paranoid is badly produced compared to anything post 2010. But still, on a machine it is pretty much unnoticeable.

[174] Neurostreamz

Song Description			
Song 1	Reso - Move It		
Song 2	Quadrant - 206		
Song 3	Noisia - Dead Limit		
The first 100% original file, replacing a file called Dishwasherz, which was too easy for the BPM. I mixed 3 of my favorites Neurofunk tracks released recently. Result is a very solid drum & bass mini-mixtape, with great growling basslines to keep you moving. It is still quite dark, but production levels of these tracks are great and the tracks are changing a bit of 174s stamina regular files, being way darker. I'm proud of it.

Song Description

Song 2	Betwixt & Between - Division 4		
Song 3	Arkitech & Sharkey - Quadraphinix		
Some great punchy songs in there. Hype really goes up at the end of TGB, which is the last Cranked Pastry song of the pack. This mini-thon also has the firsts Zaia charts ! The mix should either be a good warmup or a great song to push on, the hype is on when the difficult parts are coming. Also, due to the nature of the speedup in Division 4 I did put a stop which is C-Moddable.

Song Description

Song 2	Nexus - Havoc Impact		
Song 3	Helblinde - A Reyvateils Curse		
One the files included in ECS5 that received great reviews already. First song is really underrated in Cirque du Lykan, and is mixed with an all-time classic sped up to 190, Havoc Impact. A Reyvateils Curse is occupying a good chunk of these 10 min with a punchier kick, sounds crazy good at this speed. Still in the darkness for the general tone, but with a bit of a dramatic emphasis. Hype is everywhere in this !

<p>The only Metal mixtape in the pack, first time doing one of these musically speaking. I adjusted the speed for all songs, now I can not listen to this Rhapsody track at its original speed anymore. In general this sounds quite good, and it is quite hype ! Some of these songs may seem a bit dated but in the end mixing them gave them a fresh breathe of air. Best song for singalong tribute videos. I will make more of this style soon.</p>

								I had this with the original FOTS expert but in the end I changed for Fuhrer Of The Storm, and it bumped difficulty from 17 to 18. Also on The Gears I modified the general patterning : jumps simplified, no towers.

[200] Fast Animu Music

Song Description			
Song 1	Sanzensekai - Iro wa jyuu he to sasou		
Song 2	Helblinde - Love Is War		
Song 3	Dj Sharpnel - Gate Openerz		
First J-Core mix of the two, one of the tracks that I played the most in testing, the three songs are really good and go well with each other, and are well produced. First song is one of the lesser known charts of Aoreo that has really great rhythms, while the two others are pretty well known already. In the end, it is maybe musically speaking the weak point of the pack, but it is still quite good.

Song Description			
Song 1	Helblinde - Aura		
Song 2	DJ Sharpnel - Future Dominators		
Song 3	Goreshit - No More Faking		
<p>From the limited amount of streamy 210 songs that I really liked, this second J-Core mixtape emerged. It is maybe a bit deeper than the first, but last song really puts it into light. I considered doing something darker, but FD was not as played as Black Chocolates which was featured in many tournaments so it ended in here. Pretty solid mix overall I'd say. Also hype.</p>

[220] Dernier Voyage

Song Description			
Song 1	Betwixt & Between - 12 LFOS		
Song 2	Dj Nanazaki - Unorthodox Red		
Song 3	Goreshit - Thinking Of You		
<p>"Last Trip" said in French. Roughest song BPM-wise, but still not too aggressive. Only mix to feature the three songs in full. Break is significantly larger in 12LFOS, and has additional parts. Also chosen for ECS5, because 21s at this speed are not so common. These 3 songs were played a lot around BP3, and I wanted to bring them back ! It sounds like a real boss song.</p>
